Lighting

A close-up photograph of several MaxiLED MaxiCC Small Globe lights. The lights are small, clear plastic globes with a textured surface, mounted on a dark, flexible strip. They are illuminated with various colors including green, blue, orange, and white, creating a vibrant, multi-colored effect. The background is dark, making the lights stand out.

## Description

MaxiCC Small Globe Random delivers movement and visual interest without the need for control systems, programming, or commissioning. Using 32 mm globes operating at 24V, it supports long runs of 200+ globes per power supply, with each strand providing automatic, random color change along its length. The result is a lively, always-active effect that is easy to install and well suited to decorative projects where impact and simplicity are key.
